## TURN YOUR BACKYARD INTO AN OASIS WITH A COSTA MAGNA POOL (BY ASTRAL)

Apart from the natural benefits of having a Magna Pool, the pool itself can be an integral part of your backyard. Whether it is entertaining friends and family on a summer's day or just for cooling off and relaxing in the comfort of your own home, a pool makes the backyard complete. Over the many years of building pools for our valued clients, we have had many requests for different design configurations.

If you choose to integrate your pool close to the home (similar to that of our display) it is imperative to plan the house design with the main home as some piercing of the house slab will be required.

It is also important to determine the 'type of use' for the pool as it will dictate the size configuration, and depth.

### TYPES OF USE

1. Simply cooling off with friends with a refreshing drink in hand, may require some bench seating around the perimeter.
2. For those that are looking for the added benefits of weightless exercise, you may consider a standard depth throughout, and /or a swimjet to accomplish laps against a constant current.
3. For the fitness conscious, you may choose a long narrow pool for swimming laps.
4. For those who enjoy a deeper relaxation you may wish to choose a heated concrete spa attached to your pool.
5. To make full use of your pool all-year-round, you may want to consider the use of an electric Heat Pump (great for all-year-round when used in conjunction with a pool blanket)

### HEATING OPTIONS

1. Electric heat pumps. *Note: Running costs incurred will increase with this option based on overall pool size and size of unit.*

Astral Viron Heat Pump

Astral E3 Variable speed Pump (energy efficient)

Astral Halo chlorinator

Titan Series Sand Filters

## RELAX ENTERTAIN COOL OFF

Astral S20 Mechanical suction pool cleaner

### SANITATION

#### MagnaPool System

The MagnaPool® system is made up of a range of components that when combined create a swimming experience like no other with many health benefits. These components are the heart of a MagnaPool® and each component has benefits when used singularly, but when all are combined the result is truly amazing.

#### MagnaPool® Minerals

MagnaPool® uses a unique blend of natural ocean minerals. This combination of Magnesium and Potassium Chloride work in conjunction with the MagnaPool® Hydroxinator to not only sanitise your pool water, but also keep it crystal clear, healthy and silky smooth.

The MagnaPool® minerals and this process combine to create the most natural and superior water quality, along with a range of benefits and a level of comfort for the swimmer that is unsurpassed.

#### Hydroxinator

The MagnaPool® Hydroxinator is the heart of the MagnaPool® system. It uses the minerals in the MagnaPool® system to keep your water clean, healthy and sanitised. Using the principle of electrolysis to create the required sanitiser, this method has been used in residential pools and spas across the world for years. The MagnaPool® Hydroxinator takes advantage of this technology to provide you with an easy-to-use, no-nonsense, fully-automated system right at your fingertips. This is serviced by our reliable and efficient Astral Epumps.

#### Saltwater Chlorination

For those that aren't sold on MagnaPool® and are leaning towards the traditional saltwater chlorinated pool, we like to use the halo chlorinators, once again matched with the Astral energy efficient variable speed Flopro E3Pump – 8 star energy rated.

### POOL INTERIOR

Costa pool liners are finished with pebblecrete and are offered in various coloured stone to create the desired colour for the pool water. The range of pool liner pebble colours include black, white, blue and champagne stone and are available in many combinations to achieve different shades of water colour.

#### Tumbled Glass (Jewels for pools)

Also available as an option to create a glistening finish with any combination of colours you wish, and a finish so smooth and vibrant that's guaranteed never to fade.

### POOL SURROUND

Our pools are finished with a tiled waterline and coping edge that wraps around the perimeter, providing a contemporary clean line look to your new pool.

### POOL FENCING

There are 2 main solutions provided and sometimes both are used in combination.

1. Flat top aluminum pool fencing and gates.
2. Frameless glass pool fencing and gates.

Spa Electric Quantum LED light

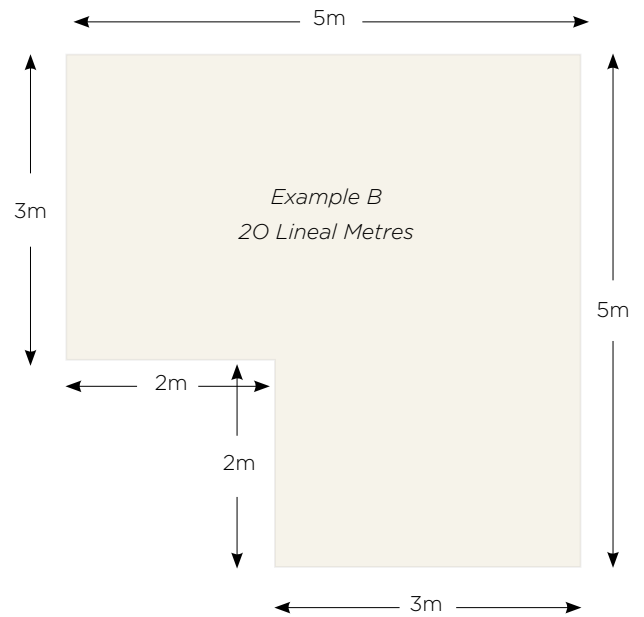

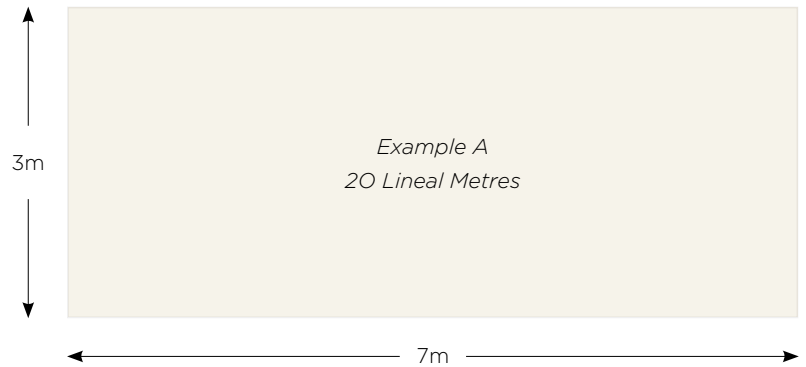

Handover Kit

## SWIMMING POOLS

### SIZE

The shape and size of your pool is limited only by your imagination and space. Below are some examples of how a pool is measured.
